Manage orders and customers	**Page 3**
Add products and update stock	**Page 4**
Run promotions and update pages	**Page 5**
Set up delivery, settings, reports and team access	**Page 6**

Find an item in the store

1. Open the store and choose **English** or **Arabic** using the language switcher.
2. Open **Shop**, pick a category or collection, or use the search icon. Use filters for color, size, price and availability, then sort the results.
3. Open a product and choose a color and size. Tap a photo to enlarge it. Use **Size guide** if available and check the price, stock and delivery estimate.
4. Tap **Save** to add it to your wishlist or **Share** to copy its link. Use the WhatsApp button to ask about the item when available. Recently viewed and related items can help you find more options.

For the store team

Add **/admin** to the end of your store address and sign in with your team email and password. Start at **Dashboard**. Use **View store** to see the customer site and **Sign out** when finished. The owner has extra menu options.

Order and track

Customers can pay cash on delivery and order with or without an account.

Place an order

1. On a product page, choose the color, size and quantity. Tap **Add to bag** to keep shopping, or **Order now** to go straight to checkout for that item.
2. In **Your bag**, review the items, change quantities or remove items. Choose a delivery area to see the fee and enter a discount code if you have one. Then tap **Checkout**.
3. Enter your name and Qatar mobile number. Choose your area and enter the **Zone, Street and Building** numbers from your blue address plate. Add an email, directions, a map pin or a preferred date if offered and useful.
4. Review the items, discount, delivery fee and total. Select **Cash on delivery** and tap **Place order**. Keep the order number from the confirmation page. If you entered an email, check your inbox for confirmation.

Track a delivery

1. Open **Track your order** from the store menu or footer. Enter the order number and the same mobile number used at checkout.
2. Tap **Track your order** to see the latest status. Signed-in customers can also open **My orders**. For questions, use **Contact** or the store's WhatsApp link.

Use a customer account

1. Open the account menu. Choose **Create an account** or **Sign in**. Use **Forgot your password?** to request a reset link.
2. Open **Addresses** to add or edit a saved address and choose the default. At checkout, pick a saved address or save a new one. Open **Wishlist** to find saved items across devices.
3. Open **My details** to update your name, phone or password. To change your email, enter your current password and open the confirmation link in the same browser.

Manage sales

Confirm new orders, prepare deliveries and record the cash you receive.

Process a website order

1. Open **Orders** and select **Waiting for confirmation**. Open the order and review the items, total, address and notes. Use **Call** or a ready-made **WhatsApp** message to confirm with the customer.
2. Select **Confirm order**. To change quantities, add items or correct the fee before dispatch, open **Change items**, then **Save changes**. Add a team note if needed.
3. Open **Packing slip** or **Invoice** and choose **Print**. Select **Mark packed** when ready and **Send out for delivery** when it leaves.
4. Use **Mark delivered** when it arrives. Tick **The driver collected the cash** only if paid, or use **Mark cash collected** when the cash is confirmed.
5. If delivery fails, mark **Delivery failed**, then reschedule or cancel as appropriate. Cancel an eligible order or **Mark returned** after a return. The shop puts eligible items back in stock.

Enter a phone or social media order

1. Go to **Orders** and select **Enter an order**. Choose where the order came from and the customer's language.
2. Add the products, colors, sizes and quantities. Enter the customer and delivery details, check the fee and total, then choose **Create order**. Manual orders start as confirmed.

Customers, messages and exports

Customers: Search by name or phone, open a customer to see orders, and save team notes or block new online orders from that number if needed.

Messages and Subscribers: Open customer enquiries in **Messages**. Open **Subscribers** to view sign-ups or choose **Download CSV** for a spreadsheet.

Order exports: In **Orders**, search by order number, name or phone. Filter by status, payment, source, delivery area or dates, then choose **Download CSV**.

Products and stock

Set up a product, add photos for each color, then enter quantities by size.

Prepare your catalog

1. Open **Categories** to add sections shoppers can browse. Use **Collections** to group products for a theme or promotion. Add English and Arabic names, choose the display order, and enable them when ready.
2. In **Colors** and **Sizes**, add any options you sell. Use **Size guides** to create a measurement chart, then select the guide on the product.

Add and publish a product

1. Go to **Products** and choose **Add product**. Enter the names, descriptions, category and QAR price. Select a collection or size guide if useful. Choose **Save and add colors**.
2. In **Colors & photos**, add each color you sell and upload clear photos for it. Reorder the photos or colors as needed. Use **Show first** for the color shoppers should see first.
3. Open **Sizes & stock**. Choose the sizes offered in each color and enter how many are available. Select **Save sizes and stock**. To set a different price or SKU for a color and size, use **Save SKUs and prices**.
4. Return to **Details**. Set the status to **Active** and choose **Save details**. Open **View store** to check the photos, price and available options.

Update stock or hide a product

1. Open **Inventory** and find the item by product name or SKU. Filter for low or sold-out stock, select the color and size, enter the change and reason, then save. Use **Stock history** to see previous changes.
2. To take a whole product off the storefront, open its **Details** and change the status from **Active**. To hide one color, turn off **Show this color to shoppers** on that color.

If a product is missing

Check that it is **Active** and has at least one visible color with a photo and a size offered. Add stock for customers to order it.

Promote the store

Update the home page, share links and give shoppers clear information.

Change a home banner

1. Open **Home banners** and choose **Add banner**. Upload a desktop image and, if you have one, a mobile image.
2. Add optional text and a link to a product, category or collection. Set the display order and optional start and end times in Qatar time. Save, then check the home page on a phone.

Share a short link

1. Open **Short links** and choose **Make a short link**. Name it and paste or select a store page. You can also start from a product.
2. Add optional campaign tags, such as Instagram or Eid, to identify orders from the link. Save and copy the short link for ads, bios or WhatsApp. Open **Short links** later to see visits and orders.

Create a discount code · Owner

1. Open **Discount codes** and choose **Add discount code**. Enter a code shoppers can type. Choose a percentage, a QAR amount or free delivery.
2. Set any dates, minimum spend, total uses, uses per customer or first-order rule. Turn on **Code can be used** and save. Share the code or its link. Open it later to check usage.

Update store information · Owner

1. Open **Pages** to add or edit information such as About, Delivery, Exchanges, Privacy and Terms. Enter English and Arabic text, choose where it appears, then publish and save.
2. Open **FAQ**, choose **Add question**, and enter the question and answer in both languages. Publish it, save and check the public FAQ.

Other ways shoppers reach you

The store offers a contact form, WhatsApp and social links when set up, and a sign-up form for updates. The team can check enquiries and subscriptions from the admin menu.

Run the store

Use these settings to manage delivery, your team, reports and marketing accounts.

Set delivery and store details

1. Open **Delivery areas**. Add or edit the area names, fee and earliest and latest delivery days. Set an optional free-delivery amount and turn on **Delivering to this area**. Save and check the fee at checkout.
2. Open **Settings**. Set the store name, contact details, WhatsApp button and social links. Add the announcement and exchange promise in both languages.
3. Set the store-wide free-delivery amount, days without delivery, preferred-date option and order quantity limit. Add an alert email for new orders and the low-stock summary, choose a low-stock level and edit the team's WhatsApp messages. Choose **Save settings**.

Review sales and manage team access

1. Open **Dashboard** for daily orders and low-stock reminders. In **Reports**, select a date range to review sales, cash collected and results by area, campaign, discount or item. Download the relevant report as a CSV spreadsheet.
2. In **Team**, select **Add team member**. Enter the person's name and email, choose **Staff** or **Owner**, and set a password. Staff handle orders and catalog work. Owners also have access to reports, team management and store settings.

Connect ads and product feeds, if you use them

1. With your marketing team, open **Settings** to enter the tracking IDs for Meta, TikTok, Snapchat or Google Analytics. Meta and TikTok also support sending purchase events from the store. Set the visitor tracking consent option and save.
2. Under **Catalog feeds**, set a feed password, save, and copy the correct Meta or TikTok feed link for your marketing team. The link sends product information to the ad platform. Keep password-protected links private.

A quick daily routine

Check **Orders** for new sales, **Messages** for enquiries and **Inventory** for items running low. After changing products, prices or store details, choose **View store** and check the English and Arabic pages.
